

BEFORE

THE MEMORY ERASER:

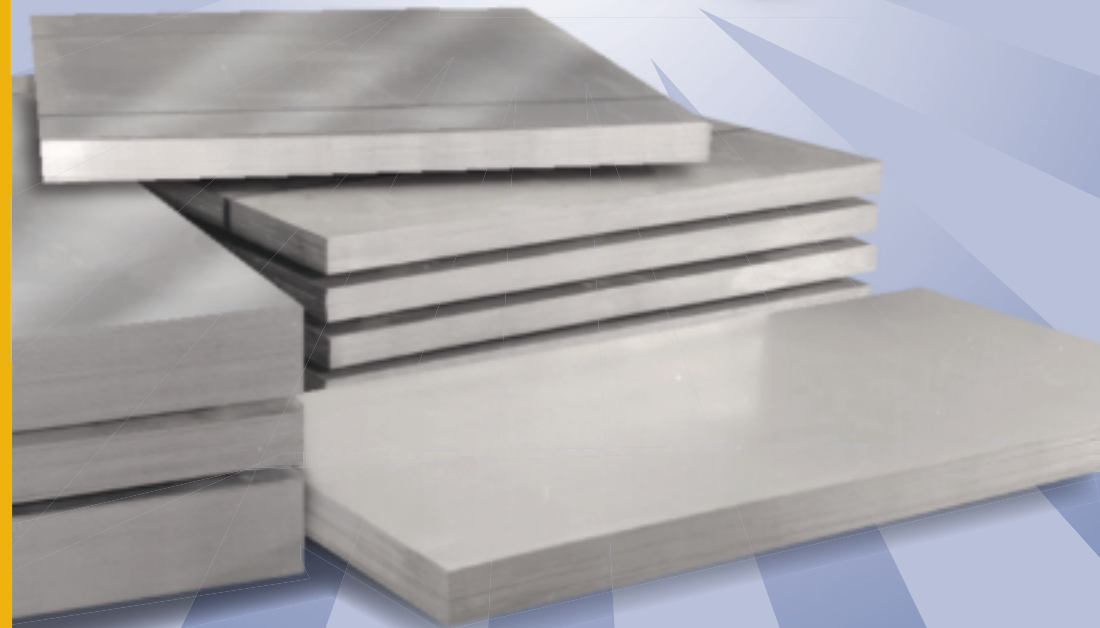

“I remember everything.”

AFTER

THE MEMORY ERASER:

“I have no recollection of... anything.”

The **MEMORY ERASER**, our new stretcher-leveler will give you **MEMORY FREE**, flat sheets.

A BETTER IDEA:

Instead of leveling or temper rolling steel to flatten it, our Memory Eraser flattens steel by pulling along the length until all of the shape problems and internal stresses are removed. All while maintaining surface condition and quality.

A BETTER RESULT:

Because all of the stresses have been relieved, Universal's Memory Free sheets have zero memory and no spring-back. This makes Memory Free sheets ideal for general fabrication requiring laser or plasma cutting.

IMPROVED PRODUCTIVITY, FEWER REJECTS.

Memory Free material processes like a dream. Quality problems disappear. Machines can run at higher speeds, with greater yields, less waste and lower costs.

GETTING STEEL SHEETS THIS FLAT IS QUITE ASTRETCH.

The Memory Eraser has the power to process material up to **3/4" x 74"**, including HS steels beyond 100,000 psi yield. We can keep lead times very short and offer you a cost-effective alternative to buying discrete plate.

THE SOLUTION IS COMING

THE UNIVERSAL STEEL COMPANY

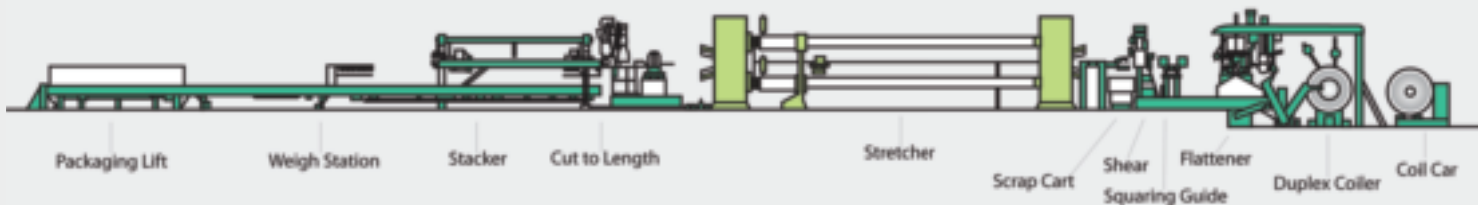

www.univsteel.com

The entry end of the line is nearing completion.
 The uncoiler, flattener and shear have been installed.
 Next step: delivery and installation of the stretching unit.

STRETCHER LEVELER

**THE UNIVERSAL
STEEL COMPANY**

CONSTRUCTION TIMELINE

March

Equipment being delivered to site, installation in progress.

April

Completion of installation and testing.

May

Start-up and commissioning.

THE UNIVERSAL STEEL COMPANY

6600 Grant Avenue • Cleveland, Ohio 44105

Universal Steel now
offers three different
processes to provide you
with the level flat rolled
steel that works best for
your application.

1

The Memory Eraser

New stretcher leveler will
provide material up to
3/4" x 74" that is perfectly
flat, Memory Free and
stays that way.

2

The Shape Corrector

Our coil to coil Shape
Corrector eliminates shape
problems in steel up to 72"
wide, 0.056" to 0.160".

3

Precision Leveling

Capabilities across the
entire range. Widths to 74",
gauges from .028" to 1/2".
